

Washington State Energy Code (WSEC) Compliance Worksheets Information

Community and Economic Development

General Information

The City of SeaTac requires WSEC Compliance Worksheets for most projects. Those worksheets are available for free, on-line, in two separate locations, one website for residential projects and one website for commercial projects. The types of projects and the links to the appropriate compliance worksheets are listed below.

The worksheets are Excel spreadsheets that, if filled out on-line, will complete all required calculations automatically. In addition, the website also provides complete Instructions. The worksheets can be printed out and filled in by hand but it is highly recommended to complete them on-line to avoid math errors and internal inconsistencies.

Residential Energy Code Compliance Worksheets

Residential projects* can use the worksheets found at the **WSU Energy Program** website located at:

<http://www.energy.wsu.edu/BuildingEfficiency/EnergyCode.aspx#EnergyCodeWorksheets>

Select **“Prescriptive Worksheet – All Climate Zones”**

There are additional resources and worksheets available in this same location so be sure to review any of those documents that may be relevant to your project.

For technical support:

Email: enregycode@energy.wsu.edu

Phone: WSEC Residential Code Hotline at **360-956-2042**

*Residential projects are defined by the WSEC as: detached one- and two-family dwellings, and multiple single-family dwellings (townhouses) as well as Group R-2 buildings three stories or less in height above grade plane. See the International Building Code for complete descriptions of Group R occupancies.

Commercial Energy Code Compliance Worksheets

Commercial projects can use the worksheets found at the **Northwest Energy Efficiency Alliance (NEEA)** sponsored website located at:

<https://wseccompliancedocuments.com/>

This website requires that you create a login before you can access the documents and resources available on the site.

For technical support contact **Evergreen Technology Consulting (ETC)**:
