

# Miller Creek Realignment Project

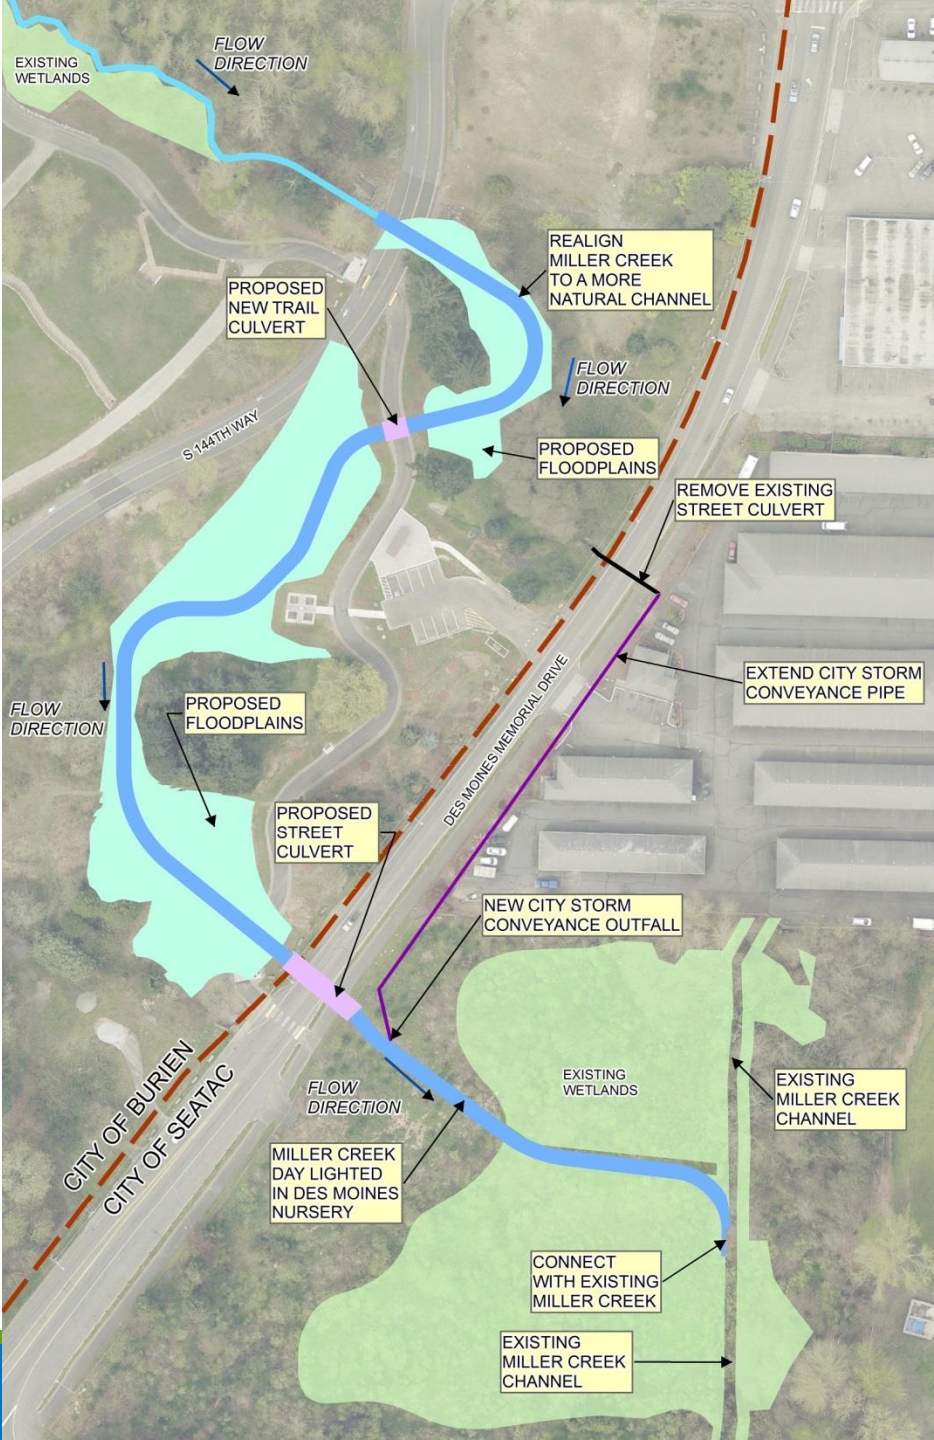

---

SEPT 5, 2019

# Existing Condition

# Miller Creek Realignment

# Project Benefits

---

- Daylights about 340 feet of Miller Creek
- Improves water quality
- Improves riparian environment, stream habitat and fish passage
- Creates floodplain and flattens creek to reduce high flows
- Sustainable design

# Project Benefits

---

- Resolves risks associated with two failing culverts
- Leverages funding from the Port for design
- Partnership required to achieve project goals
- Achieves priorities of Miller-Walker Basin Partnership
