

Transportation & Public Works Committee Meeting Minutes

November 3, 2022
5:30 PM – 6:30 PM
** Hybrid Meeting **

Members:	Present:	Absent:	Commence: 5:30 PM
			Adjourn: 6:24 PM
Peter Kwon, Chair	X		
Jake Simpson	X		
Takele Gobena	X		

Other Councilmembers participating:

Staff Coordinators: Will Appleton, Public Works Director; Florendo Cabudol, City Engineer

Other Staff Participating: Mason Giem, PW Programs Coordinator; Kamal Mahmoud, Engineering Manager; Ha Dao, Assistant City Attorney; Cindy Corsilles, Chief Prosecutor Attorney/Assistant City Attorney

Public Comment	No public comment
1. Approve Prior Meeting's Minutes	October 6 Minutes were approved
2. South 180 th Flood Reduction Final Acceptance	<p>City Engineer Florendo Cabudol presented the completion of the South 180th Street Flood Reduction project and the proposed Council action granting final acceptance. This proposed action is on for the November 8th regular council consent agenda.</p> <p>The South 180th Street Flood Reduction Project's goal was to eliminate recurring flooding on City Right-of-Way at the eastern terminus of South 180th Street, near the entrance to the Hunt Club Apartments. To achieve this, a small segment of South 180th Street was repaved and raised out of the flood plain. In addition, the following storm drainage improvements were made:</p> <ul style="list-style-type: none"> • Remove and replace segments of the existing storm drainage system.

	<ul style="list-style-type: none"> • Reconstruct the drainage outlet at the terminus of South 180th Street. • Replace several segments of undersized drainage pipes on South 182nd Street. • Re-grade the existing drainage channel that carries stormwater between South 180th and South 182nd streets. New landscaping and wetland plantings were also planted within the drainage channel. <p>This project was completed in April of this year and came in \$100,000 under budget.</p> <p>Public Works received \$320,000 in grant funding from the King County Flood Control District for construction.</p> <p>The Committee asked a question regarding the standing water concern with Emmanuel Baptist Church. The City is currently working with the Church to resolve this issue.</p> <p>The Committee unanimously recommended this item to be placed on the Consent Agenda with a recommendation to approve.</p>
<p>3. Amendment to design contract for 34th Ave S (ST-015)</p>	<p>City Engineer Florendo Cabudol asked for this item to be placed on the consent agenda with a recommendation to approve at the November 8th regular council meeting.</p> <p>A professional services contract with Parametrix was approved by the Council through Agenda Bill 4903 and executed on July 24, 2018. Four prior amendments were executed to address changes in scope and an extension in the contract duration to December 31, 2023. A fifth contract amendment is being requested based on the following reasons:</p> <ul style="list-style-type: none"> • Additional services related to extending temporary construction easement (TCE) agreements with property owners to complete restoration work (current agreements are set to expire on December 31, 2022). • Additional services related to addressing necessary design changes during construction due to changed conditions. <p>This amendment increases design costs by \$58,003.61 and will be paid through existing Transportation CIP Fund (#307) appropriations for the project in the 2021-2022 Biennial Budget. Therefore, the total cost for the design contract will increase from \$805,503.64 to a not to exceed amount of \$863,507.25. The total cost of design is still less than 15% of the construction cost, which is industry standard for projects of similar scope and complexity. No</p>

	<p>amendment to the 2021-2022 Biennial Budget is required for this action.</p> <p>An additional \$374,653 was recently awarded from Safe Routes to School Program towards the construction of this project.</p> <p>The Committee unanimously recommend this item to be placed on the Consent Agenda for recommendation to approve.</p>
<p>4. Approve Ordinance for Compost Procurement</p>	<p>Will Appleton, Director of Public Works asked for this item to be places on consent agenda with a recommendation to approve at the November 8th regular council meeting.</p> <p>House Bill 1799 is requiring cities and counties to adopt a compost procurement ordinance to ensure compliance with state statute.</p> <p>The current compost procurement ordinance is very close to its final wording. The ordinance specifies that if a project or operation by the City can utilize compost, then the city shall be required to purchase of compost on the following types of projects and operations: Landscaping; construction and post-construction soil amendments; applications to prevent erosion, filter stormwater runoff, promote vegetative growth, or improve the stability and longevity of roadways in accordance with SMC Chapter 12.</p> <p>The City shall also promote the use of compost products by informing residents about the value of compost, publicizing its compost procurement programs, and how the City uses compost in its operations and in accordance With comprehensive solid waste management plan under SMC Chapter 12.15.</p> <p>The City will also be required to report its quantities purchased, where used, and other statistics.</p> <p>The Committee raised a question regarding if there will be a significant budget impact and if there will be state funding provided. The budget impact it unknown at this time; however, it is not expected to result in significant increased costs or dramatically change our current purchasing practices. The State will provide no funding.</p> <p>Two small changes to the draft ordinance will be made prior to the December 13th council meeting. They do not change the ordinance in any significant way.</p>

	<p>The Committee unanimously recommend this item to be placed on the December 13th Consent Agenda for recommendation to adopt.</p>
<p>5. Department Updates</p>	<p>Will Appleton, Public Works Director presented the following department updates:</p> <p>Construction is slowing down due to wet weather.</p> <p>We are ready for snow and ice weather. Primary plow routes are available online.</p> <p>The 2022 Overlays Project is wrapping up and is substantially complete.</p> <p>Lakes to Sound Trail segment C is still under construction and there is some additional paving that will bring value to community.</p> <p>The 34th Ave South project is ongoing and is 80% complete. The aerial utilities are being placed underground and final paving will occur in Q2 of next year when we have warmer weather.</p> <p>Public Works Maintenance will be planting barberry plants in the median of International Blvd between S. 188th and S. 200th to keep pedestrians from using the medians to cross against the intersection.</p> <p>We are working with WSDOT as Phase 2 of SR509 Extension is beginning. This will extend the current construction south to 188th street for a full interchange of the freeway.</p> <p>Public Works will be sharing with the communications team regarding the plow routes for any upcoming snow and ice related events.</p>
<p>6. Adjourn</p>	<p>Meeting adjourned at 6:24pm.</p>
