Re: Water and Sewer Availability Letter – Angle Lake Park Waterfront Improvements Project

Farallon Consulting LLC dba Grette Associates (Grette) is under contract with Mott MacDonald to provide assistance with the City of SeaTac (City)'s Angle Lake Park Waterfront Improvements Project (Project). The proposed Project is located at 19408 International Boulevard within the City of SeaTac (Project Site; Parcel 0422049002).

The proposed project consists of conducting work below and above the Ordinary High Water (OHW) line for the purpose of replacing select portions of the existing waterfront park facilities and installing new components at Angle Lake Park in the City of SeaTac, WA. The replacement and new structures will be designed to make the facility more accessible and improve public safety for swimmers. The City is proposing to replace the existing floating dock, connecting pier, gangways, and boat launch and to install a new ADA-accessible kayak access float, swim ramp and access swim stairs, and replenish scoured beach material in the nearshore.

All work will be conducted on or adjacent to the lake shoreline. No improvements to the upland facilities, including water or sewer infrastructure, are planned. Further, there is no anticipated change in volume of use (e.g., no new parking proposed, etc.) that may impact water or sewer use.

If you have any questions, please contact me at (253) 573-9300 or by email at [sashae@gretteassociates.com](mailto:sashae@gretteassociates.com).
